### ★ GABRIELLI DESIGN STUDIO ★

#### LET'S LIVE ON THIS PLANET AS IF WE INTEND TO STAY

Gabrielli Design Studio focuses on sustainable design, as well as strategic sustainability for businesses and institutions, from mission clarification to cultural and physical environments. Past work includes green residential design; new construction and renovations; LEED Green Building Rating System coordination; and a green building plan for the National Aquarium in Baltimore.

Julie is an adjunct professor at the University of Maryland School of Architecture and is currently involved with an interdisciplinary design team for the 2007 Solar Decathlon house.

#### SUSTAINABLE VALUES

My work connects people and ideas to redefine our context, our legacy, and our future as part of the natural world. When inspired by the amazing workings of natural systems, we can tap into our abundant creativity and make a better world for ourselves. Let's live on the planet as if we intend to stay.

#### SPECIAL OFFER TO CSBA MEMBERS

Free one-hour initial consult on your project, to listen to your needs and dreams and to help you map out a process to achieve them.
