★ KROIZ ARCHITECTURE ★

Established in 2001, Kroiz Architecture is a young design firm with award winning projects in the United States and Asia. Sustainable elements have featured in several of our project not only as responsible solutions, but as significant design elements.

SUSTAINABLE VALUES

We are at a stage in horticulture and agriculture where the flagrant misuse of toxic products on our plants and soil has become standard amongst professionals.

Our mission is to reduce the amount of petro chemical and toxic products being used on our land. Through educating professionals about the benefits that non-toxic products can provide, we hope to aid in the accomplishment of our mission.
