★ WIND CURRENT ★

HELPING TO IMPROVE THE AIR QUALITY IN THE MID-ATLANTIC

WindCurrent, a Baltimore small business, helps Mid-Atlantic organizations reduce their environmental impact through "Renewable Energy Certificates": A Certificate offsets a customer's traditional electricity (from coal & nuclear power) with clean, renewable power made from wind turbines. A 1000-KWh Renewable Energy Certificate decreases a customer's environmental impact by roughly 1400 pounds of CO₂.

WindCurrent customers include some of the most sustainable-minded organizations in the Baltimore-Washington area: 'bluehouse' on Fleet Street, the five financial arms of the United Nations (including The World Bank), the National Wildlife Federation, the World Wildlife Fund's US office, the US Air Force, and the City of Takoma Park.

SUSTAINABLE VALUES

I have two young children. Every day, they remind me of my responsibility to help change the future. (...and sometimes, of my need to change a diaper.)

SPECIAL OFFER TO CSBA MEMBERS

WindCurrent will help any fellow CSBA member to go 100% carbon-neutral, on a reasonable budget - and achieve significant media recognition for their decision to help change the future.
